What if it Just Started Raining?
Coren Jonathan Allen

A world in crisis...the PANDEMIC of vitriolic hatred, evil and prejudice is fueled and made exponentially more potent via today's instant access to both filtered and unfiltered information [education] available through all forms of media...(print, online, mobile, radio, television)...evil has always hung it's hat in humanity's coatroom, but it's different (worse) today...in 2016.

BBC Headlines (Week of May 02-06, 2016)

Africa

"Karen Allen: Could the military turn on South Africa's president?"

Asia

"North Korea leader praises nuclear test"

Australia

"Nauru asylum seeker sets herself on fire at Australia detention center"

Europe

"Go your own way, Erdogan tells EU"

Latin America

"Brazil leader denies obstruction claims"

Middle East

"Syria refugee camp strike 'war crime'"

US & Canada

"I won't visit US: Indians express concerns if Trump becomes president"

***Both governments and their media have substantive ownership and some measure of control regarding what matter of education is poured into the appetite of public consumption (World Development Report 2015, Spotlight 6)**

- At the outset, what I seek to do is **inherently governmental** (World Development Report 2015, Spotlight 6)
 - ✓ Ministries of Education are in place
 - ✓ Schools are built
 - ✓ Teachers are hired
 - ✓ Children are in school

- I have provided sound empirical evidence that there is indeed a **PANDEMIC** of evil and much (not all) of it was created, funded and spread through an ideological mechanism. **Education lends to thoughts and thoughts lead to action.** Daily BBC (and other) headlines are perpetual testimony to this **PANDEMIC** of the human soul.
- What if we applied and deployed my **VACCINE**? An anti-“evil” matter. **An ideological mechanism.** A radical ideology of good deliberately designed with the following compound:
 - ✓ **Political Will + Media (all forms) + International Partnership + Athletic (soccer) endorsement**
- I understand that The World Bank Group works with governments.
- I believe, that you (and Amit Dar) believe I am on to something...and that I have satisfied some of your initial curiosity.
- I believe that there is **space** for this **VACCINE** inside 1818 H. Street.
- I believe that The World Bank Group could—**in partnership** with other like, global institutions (UN, UNESCO, Gates Foundation, etc...)—activate and develop a sponsor base of resources (time, people and funding) for my project and spearhead the foundation of a **joint team** that can **deploy** this **VACCINE** into the appetite of **public consumption** everywhere.
- The evidence for investing in this **VACCINE** is clear.
- The disastrous, catastrophic repercussions if we do NOT strike at the root of today’s **PANDEMIC** of hate, prejudice and evil carry **greater long term consequence to humanity** than Ebola, Zika and many other present day PANDEMICS combined.
- I will be in Lyon, France, towards the last week of June for my god-daughter’s wedding. If **UNESCO** decision makers are willing and available, this would be an ideal time window to pop up to Paris and make a serious presentation.

EPILOGUE

If humans were better to each other, life would be better—at every level of community & society.

Social engineering can and does affect social norms (World Development Report 2015, Spotlight 6).

If politicians and world leaders were better (more honest, less corrupt, less selfish etc...) there would be **less poverty and greater shared prosperity.**

When there is drought (of earth & soul) life is difficult and the future is dismal...hope retreats into the shadows.

When it rains, life is better...full stop!

What if it just started raining?

I seek to affect this fight against evil for the rest of my good living years.
